In archaeology, survey or field survey is a type of field research by which archaeologists (often landscape archaeologists) search for archaeological sites and collect information about the location, distribution and organization of past human cultures across a large area (e.g. typically in excess of one hectare, and often in excess of many km 2). ...

Survey (archaeology) - Wikipedia

The Olmec heartland is the area in the Gulf lowlands where it expanded after early development in Soconusco, Veracruz. This area is characterized by swampy lowlands punctuated by low hills, ridges, and volcanoes. The Tuxtlas Mountains rise sharply in the north, along the Gulf of Mexico's Bay of Campeche. Here, the Olmec constructed permanent city-temple complexes at San Lorenzo Tenochtitlán, La ...

Abstract. The biblical story of the Tower of Babel is believed by many to be the record of a real historical event that took place

after the worldwide Flood, at a time when the earth's population still lived together in one place.

Where in the World Is the Tower of Babel? | Answers in Genesis

Collins, G. 1693. Chart of the Solent and the Isle of Wight. By Captain Greenville Collins, appointed in 1662 to survey the coasts of Great Britain. [This does not contain geological information but is useful in showing the original coastline of the Solent and Isle of Wight prior to much reclamation and development.]
