Assessing decision-making capacity in older individuals with dementia, now known as major neurocognitive disorder (MND), is a complex and challenging endeavor. There is a dearth of literature that touches on the sensitive and controversial topic of sexuality in institutionalized settings, despite the rapid increase in the global population of older individuals.

Balancing Sexual Expression and Risk of Harm in Elderly

Paul Ekman (15 de febrero de 1934) es un psicólogo pionero en el estudio de las emociones y su expresión facial. [1] Ha sido considerado uno de los cien psicólogos más destacados del siglo XX. [2] Ekman asume una perspectiva evolutiva, en el sentido de que el desarrollo de los rasgos y estados del ser humano, en el tiempo, es el fundamento de sus investigaciones.

Anxiety and poor stress management are common concerns in clinical samples of children with autism spectrum disorders (ASD). Anxiety may worsen during adolescence, as young people face an increasingly complex social milieu and often become more aware of their differences and interpersonal difficulties.
