### **Woodcock-Johnson Cognitive Ability Test**

Cognitive tests are assessments of the cognitive capabilities of humans and other animals. Tests administered to humans include various forms of IQ tests; those administered to animals include the mirror test (a test of visual self-awareness) and the T maze test (which tests learning ability). Such study is important to research concerning the philosophy of mind and psychology, as well as ...

Intellectual giftedness is an intellectual ability significantly higher than average. It is a characteristic of children, variously defined, that motivates differences in school programming. It is thought to persist as a trait into adult life, with various consequences studied in longitudinal studies of giftedness over the last century.

A Brief History of Psychological Testing []. Although the widespread use of psychological testing is largely a phenomenon of the 20th century, it has been noted that rudimentary forms of testing date back to at least 2200 B.C., when the Chinese emperor had his officials examined every third year to determine their fitness for office (Gregory, 1992).
