

ASSIGNMENT ON IONIC AND COVALENT COMPOUNDS SSS CHEMISTRY

### **assignment on ionic and pdf**

Prior to this lesson my students were introduced to ionic bonding using an ExploreLearning Gizmo. In this lesson my students continue to learn ionic bonding, this time by modeling the process using Lewis dot diagrams.

A computer fan is any fan inside, or attached to, a computer case used for active cooling. Fans are used to draw cooler air into the case from the outside, expel warm air from inside, and move air across a heat sink to cool a particular component. Both axial and sometimes centrifugal (blower/squirrel-cage) fans are used in computers. Computer fans commonly come in standard sizes, and are ...

## Chemistry PowerPoint Lessons, Handouts, Labs, and Worksheets

The oxidation state, sometimes referred to as oxidation number, describes the degree of oxidation (loss of electrons) of an atom in a chemical compound. Conceptually, the oxidation state, which may be positive, negative or zero, is the hypothetical charge that an atom would have if all bonds to atoms of different elements were 100% ionic, with no covalent component.

This is another method for working with Responsive sizes. It will keep your text centered and maintain its position within its parent. If you don't want it centered then it's even easier, just work with the absolute parameters. Keep in mind the main container is using display: inline-block. There are many others ways to do this, depending on what you're working on.
