Technology is an element of informatics and assists in the exchange of information and in clinical decision-making. Advance practice nurses (APNs) use technology to document assessment findings, evaluate diagnostic labs and procedures, order required medical tests and medications, and bill appropriately.

Health care in the United States is provided by many distinct organizations. Health care facilities are largely owned and operated by private sector businesses. 58% of US community hospitals are non-profit, 21% are government owned, and 21% are for-profit. According to the World Health Organization (WHO), the United States spent \$9,403 on health care per capita, and 17.1% on health care as ...

Health care in the United States - Wikipedia

Projectional radiography is a form of radiography and medical imaging that produces two-dimensional images by x-ray radiation. The image acquisition is generally performed by radiographers, and the images are often examined by radiologists. Plain radiography generally refers to projectional radiography (without the use of more advanced techniques such as computed tomography that can generate ...
