Baby food is any soft, easily consumed food other than breastmilk or infant formula that is made specifically for human babies between four to six months and two years old. The food comes in many varieties and flavors that are purchased ready-made from producers. Or it may be table food eaten by the family that has been mashed or otherwise broken down.

An infant (from the Latin word infans, meaning "unable to speak" or "speechless") is the more formal or specialised synonym for "baby", the very young offspring of a human. The term may also be used to refer to juveniles of other organisms. A newborn is, in colloquial use, an infant who is only hours, days, or up to one month old. In medical contexts, newborn or neonate (from Latin, neonatus ...

Guess Who? A Fun, Easy Baby Sprinkle Game

Listening to classical music may soothe your baby and turn her into a classical fan later in life, but it won't make her smarter. Researchers at Appalachian State University believe that they've debunked what has been called the Mozart effect, a temporary increase in intelligence experienced after listening to a piano sonata written by the famed composer.
