The mole is the base unit of amount of substance in the International System of Units (SI). Effective 20 May 2019, the mole is defined as the amount of a chemical substance that contains exactly $6.022\,140\,76 \times 10^{23}$ (Avogadro constant) constitutive particles, e.g., atoms, molecules, ions or electrons.. This definition was adopted in November 2018, revising its old definition based on the ...

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.
