History. The current version of BGP is version 4 (BGP4), which was published as RFC 4271 in 2006, after progressing through 20 drafts from documents based on RFC 1771 version 4. RFC 4271 corrected errors, clarified ambiguities and updated the specification with common industry practices. The major enhancement was the support for Classless Inter-Domain Routing and use of route aggregation to ...

An Internet exchange point (IX or IXP) is the physical infrastructure through which Internet service providers (ISPs) and content delivery networks (CDNs) exchange Internet traffic between their networks (autonomous systems).. IXPs reduce the portion of an ISP's traffic that must be delivered via their upstream transit providers, thereby reducing the average per-bit delivery cost of their service.

Internet exchange point - Wikipedia

Routing von Paketen. Beim paketvermittelten Routing, wie es z. B. im Internet stattfindet, wird dafür gesorgt, dass logisch adressierte Datenpakete aus dem Ursprungsnetz herauskommen und in Richtung ihres Zielnetzes weitergeleitet werden. Routing ist die Basis des Internets – ohne Routing würde das Internet nicht existieren, und alle Netze wären autonom.

Border Gateway Protocol (BGP) est un protocole d'échange de route externe (un EGP), utilisé notamment sur le réseau Internet. Son objectif principal est d'échanger des informations de routage et d'accessibilité de réseaux (appelés préfixes) entre Autonomous Systems (AS).. Contrairement aux protocoles de routage interne, BGP n'utilise pas de métrique classique mais fonde les décisions ...
