

BIOCHEM

biochem pdf

The Raines Lab at the Massachusetts Institute of Technology is using chemistry to understand and control life processes. The focus is on proteins. Research projects rely on organic chemistry, biochemistry, biophysics, molecular biology, cell biology, and genetics, and often have translation to the clinic as a goal.

This journal is devoted to publishing the highest quality innovative papers in the fields of biochemistry and biotechnology. The typical focus of the journal is to report applications of novel scientific and technological breakthroughs, as well as technological subjects that are still in the proof-of-concept stage.

Oxidative phosphorylation works by using energy-releasing chemical reactions to drive energy-requiring reactions: The two sets of reactions are said to be coupled. This means one cannot occur without the other. The flow of electrons through the electron transport chain, from electron donors such as NADH to electron acceptors such as oxygen, is an exergonic process – it releases energy ...

Oxidative phosphorylation - Wikipedia

Journal Impact Factor: 1.48. ISSN: 2471-8084. Biochemistry and Molecular Biology Journal is an international scholarly, peer reviewed journal presenting original research contributions and scientific advances related to the field of Biochemistry & Molecular Biology.
