- vi-ACKNOWLEDGEMENTS The Zambia Strategic Country Gender Assessment (ZSCGA) is a collaborative effort between the World Bank, Government of Zambia and Zambian gender experts.

ZAMBIA STRATEGIC COUNTRY GENDER ASSESSMENT

Highlights Observer and victim characteristics influence rape victim blaming. RMA, gender role conformity and substance use influence rape victim blame. Men demonstrate higher RMA and higher levels of victim blaming than women. Women who violate traditional gender roles are attributed more blame. Intoxicated victims are blamed more than sober victims.

Attribution of blame in rape cases: A review of the impact

This article presents the ways in which Muslims and Arabs are represented and represent themselves in video games. First, it analyses how various genres of European and American video games have constructed the Arab or Muslim Other.
