Deliver custom notifications within the Salesforce platform and in external apps.

Integration and APIs Developer Center

A web service typically offers a WSDL from which you can create client stubs automatically. Web Services are based on the SOAP protocol. ASP.NET Web API is a newer Microsoft framework which helps you to build REST based interfaces. The response can be either JSON or XML, but there is no way to generate clients automatically because Web API does not offer a service description like the WSDL from ...

What is the difference between a web API and a web service?

Salesforce Lightning Platform is an application development platform that extends your CRM's reach and functionality. It helps connect employees, engage customers, integrate, and connect everything and everyone.

Heroku is a cloud platform as a service (PaaS) supporting several programming languages. Heroku, one of the first cloud platforms, has been in development since June 2007, when it supported only the Ruby programming language, but now supports Java, Node.js, Scala, Clojure, Python, PHP, and Go. For this reason, Heroku is said to be a polyglot platform as it has features for a developer to build ...
