SAP Business One SDK - Capture and override PDF Export Button Event. I have a client who would like to avoid the use of a PDF generator tool like Bullzip and retain the standard functionality. The first approach which comes to mind is overriding the PDF export button click event from the Toolbar menu using the UI-API, but I've researched a bit and can't find if this is possible or not.

### **SAP Business One SDK - Capture and override PDF Export**

The SAP Business One Software Development Kit (SDK) allows you to integrate third-party applications with SAP Business One both at the database and user interface level. It is an ideal platform to change and extend the functionality of SAP Business One with specific functionality required by your particular business.

### **SAP Business One SDK Standard and Guidelines.pdf**

SAP Business One database itself against the SAP Business One business logic. Accessing directly the SAP Business One DB in write operations – e.g. with an ODBC connection – is against the programming guidelines of SAP Business One SDK as it can introduce inconsistencies in the system data. DI-API is implemented as a DLL based upon Microsoft COM.
