sarason complex function theory pdf

In complex analysis, a complex logarithm of the non-zero complex number z , denoted by $w = \log z$, is defined to be any complex number w for which $e^w = z$. This construction is analogous to the real logarithm function \ln , which is the inverse of the real exponential function e^y , satisfying $e^{\ln x} = x$ for positive real numbers x . Since any complex number has infinitely many complex logarithms ...

Dichotic listening or the Dichotic listening test is a psychological test commonly used to investigate selective attention within the auditory system and is a subtopic of cognitive psychology and neuroscience. Specifically, it is "used as a behavioral test for hemispheric lateralization of speech sound perception.": 381 During a standard dichotic listening test, a participant is presented with ...

Deliberate and emergent strategies may be conceived as two ends of a continuum along which real-world strategies lie. This paper seeks to develop this notion, and some basic issues related to strategic choice, by elaborating along this continuum various types of strategies uncovered in research.

En análisis complejo, una función logaritmo complejo es una "función inversa" de la función exponencial compleja, de la misma manera que el logaritmo natural $\ln x$ es la función inversa de la función exponencial e^x .Entonces, un logaritmo de z es un número complejo w tal que $e^w = z$. [1] La notación para tal w es $\log z$.Pero debido a que todo número complejo z distinto de cero tiene ...
