Coding, Payment, & Coverage for Fluorescence Vascular

A related idea is based on a system of shorthand called Speedwriting: There used to be ads in the New York City subway system that read something like this: . if u cn rd ths, u cn lrn spdwrting. The key idea in abbreviating is to use abbreviations that will make sense to you. You can put an abbreviation key in the margin of your notebook for any abbreviations that you make up on the spot.

In 3-dimensional geometry, for a finite planar surface of scalar area S and unit normal \hat{n} , the vector area \vec{S} is defined as the unit normal scaled by the area: $\vec{S} = S \hat{n}$ For an orientable surface S composed of a set S_i of flat facet areas, the vector area of the surface is given by $\vec{S} = \sum S_i \hat{n}_i$ where \hat{n}_i is the unit normal vector to the area S_i . For bounded, oriented curved surfaces that are ...

In physics, apparent weight is a property of objects that corresponds to how heavy an object is. The apparent weight of an object will differ from the weight of an object whenever the force of gravity acting on the object is not balanced by an equal but opposite normal force. By definition, the weight of an object is equal to the magnitude of the force of gravity acting on it.
