VO<sub>2</sub> max (also maximal oxygen consumption, maximal oxygen uptake, peak oxygen uptake or maximal aerobic capacity) is the maximum rate of oxygen consumption measured during incremental exercise; that is, exercise of increasing intensity. The name is derived from three abbreviations: "V" for volume, "O<sub>2</sub>" for oxygen, and "max" for maximum. Maximal oxygen consumption reflects cardiorespiratory ...

The Ford flathead V8 (often called simply the Ford flathead, flathead Ford, or flatty when the context is implicit, such as in hot-rodding) is a V8 engine of the valve-in-block type designed by the Ford Motor Company and built by Ford and various licensees. During the engine's first decade of production, when overhead-valve engines were rare, it was usually known simply as the Ford V<sub>8</sub>, and ...

1. Introduction. The failure by leading economists to incorporate banking in their economic theories has been identified as a significant and costly weakness (Werner, Richard A., 1997, Werner, Richard A., 2005, Kohn, Donald, 2009). Likewise, it has been pointed out that the macro-economic feedback of banking activity had been neglected in finance research (Werner, 2012).
