Architecture Overview. LoadRunner works by creating virtual users who take the place of real users operating client software, such as Internet Explorer sending requests using the HTTP protocol to IIS or Apache web servers.. Requests from many virtual user clients are generated by "Load Generators" in order to create a load on various servers under test

Most space suits are Full (Body) Pressure-suits: they offer pressurization of the entire body in space for extended periods. Partial (Body) Pressure-suits only pressurize certain parts of the body for a limited time. They are only used as a precaution, worn inside the habitat module during times when there is danger of it springing a leak (such as during lift-off).
