Developmental history Early development. In 1857, Oscar Rejlander created the world's first "special effects" movie by combining different sections of 32 negatives into a single image, making a montaged combination print. In 1895, Alfred Clark created what is commonly accepted as the first-ever motion picture special effect.

The health effects of high exposure to radon in mines, where exposures reaching 1,000,000 Bq/m³ can be found, can be recognized in Paracelsus' 1530 description of a wasting disease of miners, the mala metallorum. Though at the time radon itself was not understood to be the cause—indeed, neither it nor radiation had even been discovered—mineralogist Georg Agricola recommended ventilation ...
