In financial markets, high-frequency trading (HFT) is a type of algorithmic trading characterized by high speeds, high turnover rates, and high order-to-trade ratios that leverages high-frequency financial data and electronic trading tools. While there is no single definition of HFT, among its key attributes are highly sophisticated algorithms, co-location, and very short-term investment horizons.

A commodity market is a market that trades in primary economic sector rather than manufactured products. Soft commodities are agricultural products such as wheat, coffee, cocoa, fruit and sugar. Hard commodities are mined, such as gold and oil. Investors access about 50 major commodity markets worldwide with purely financial transactions increasingly outnumbering physical trades in which goods ...

Hello! You have landed on this page because you were heading for one of the old websites made by me, David Gauntlett, in the distant past. Most of the stuff on sites like 'theory.org.uk' and 'newmediastudies.com' was 12-20 years old, and I kept it all on the internet for a long long time in case anybody really needed it, but I think that time has now gone.

David Gauntlett | Welcome!
