You're best bet for parsing Excel files would be the xlrd library. The python-excel.org site has links and examples for xlrd and related python excel libraries, including a pdf document that has some good examples of using xlrd. Of course, there are also lots of related xlrd questions on StackOverflow that might be of use.. One caveat with the xlrd library is that it will only work with xls ...

parsing excel documents with python - Stack Overflow

From your above needs, you will need to use both Python (to export pandas data frame) and VBA (to delete existing worksheet content and copy/paste external data).

python - Pandas Dataframe to excel sheet - Stack Overflow

1.1.2 A general description of Python. Python is a high-level general purpose programming language: Because code is automatically compiled to byte code and executed, Python is suitable for use as a scripting language, Web application implementation language, etc.
