Selection Methodology. The Global Ecoregions are the results of regional analyses of biodiversity across the continents and oceans of the world, completed in collaboration with hundreds of regional experts worldwide and by conducting extensive literature reviews.

Conserving Biomes | WWF - World Wildlife Fund

Wildlife tourism is an element of many nations' travel industry centered around observation and interaction with local animal and plant life in their natural habitats. While it can include eco- and animal-friendly tourism, safari hunting and similar high-intervention activities also fall under the umbrella of wildlife tourism. Wildlife tourism, in its simplest sense, is interacting with wild ...

A healthy and stable climate underpins all life on Earth, supporting nature and people alike. Our lives depend on the natural environment to deliver the food we eat, the air we breathe, the water we drink, the clothes we wear and the products that create jobs and economic security.

Reduce Carbon Emissions & Take Action on Climate Change

Edit Text: . Conservation International was a pioneer in defining and promoting the concept of hotspots. In 1989, just one year after scientist Norman Myers wrote the paper that introduced the hotspots concept, CI adopted the idea of protecting these incredible places as the guiding principle of our investments.
